

Oguz Oksuzomer

Istanbul, Turkey | ouzoks2@gmail.com | P: +90 532 529 60 14 | [LinkedIn](#) | [GitHub](#)

Frontend-focused Full-Stack Developer specializing in React, TypeScript, and .NET. Experienced in building scalable web applications, refactoring large codebases, improving UI/UX, and developing RESTful APIs with a focus on clean architecture, performance, and maintainable code.

Projects

RusturkClub – Web Platform | React.js, .NET Core, MSSQL | Live Demo: (to be added)

- Developed a scalable, multilingual platform using React.js and Material UI
- Designed a modular frontend architecture to improve maintainability and performance
- Integrated frontend with backend APIs, handling authentication flows and dynamic data management
- Implemented i18n support and third-party integrations (Google Translate API)
- Contributed to features such as admin panel, email verification, cookie consent (KVKK/GDPR), cloudinary and role-based access control

Fitness Task Tracking & Management System | React.js, .NET Core, MSSQL | [GitHub Repo](#)

- Built a full-stack task tracking system with role-based architecture (Coach / Student / Admin)
- Implemented JWT authentication and secure authorization workflows
- Developed dynamic features such as weekly program tracking, performance monitoring, and progress analytics
- Designed and managed relational database structure using MSSQL
- Created responsive UI with React and MUI, ensuring usability across devices and delivered an end-to-end production-ready application independently

Portfolio Website (Personal Project) | React.js, TypeScript, Tailwind CSS, Vite | [GitHub Repo](#) | [Live Demo](#)

- Developed a responsive personal portfolio website to present projects, technical skills, experience, and personal branding in a production-ready interface
- Built a reusable component-based frontend architecture with multilingual support, interactive UI sections, and scalable content structure

Experience

Software Engineer Intern and Part-Time (Integration & Database)

Part Time, May 2023 - July 2023

F8 Bilişim ve Danışmanlık Hizmetleri

Intern - September 2024

- Developed and optimized PL/SQL queries and database operations for enterprise systems
- Built and maintained system-to-system integrations using Dell Boomi, enabling automated data exchange
- Contributed to API-driven data pipelines and workflow automation processes
- Assisted in designing reliable and scalable integration flows between services
- Prepared technical documentation to support system maintainability and knowledge sharing

System & Web Development Intern (Linux & Laravel)

September 2025

BNTPRO

- Managed Linux-based environments (RHEL, CentOS), including system configuration and basic administration
- Developed web applications using Laravel (MVC architecture) with focus on clean backend structure
- Implemented authentication features such as 2FA and role-based authorization
- Gained hands-on experience in secure web development and server-side architecture

Frontend-Focused Full-Stack Developer (React, TypeScript & .NET)

April 2026 -June 2026

LegiFix

- Refactored a large-scale React/TypeScript codebase to improve maintainability and application architecture.
- Optimized user flows by restructuring page scenarios, adding and removing states where necessary.
- Connected all possible user outcomes through a centralized Link Registry system.
- Performed QA testing across multiple user scenarios, identifying and resolving UI, UX, and functional issues.

Education

Isik University – Software Engineering (English) (BSc), Istanbul Turkey

2020 – 2025

React, JavaScript, TypeScript, Material UI (MUI), Tailwind CSS, .NET Core, ASP.NET Web API, MSSQL, PL/SQL, Red Hat Linux, Laravel, Vite, RESTful API Design, JWT Authentication, Role-Based Access Control (RBAC), Git, Responsive UI Development, Jira(basic), AI Tools, Swagger
